Datagraph For Mac

FileMaker Datagraph is a Dashboard widget that ties into FileMaker Pro to display dynamic graphs of FileMaker data on your desktop.. View up to 5 FileMaker database fields as a multi-colored bar graph Control the widget header display, the number of fields (1-5), the color, order and label of the bars, and even the refresh rate of the display.. Display values in the bar graph from a summary field, the count of designated fields, or the total values in a field.. Features include: Works with FileMaker Pro or FileMaker Developer databases and supports remote access with FileMaker Server 7 Advanced.
